E-Series Media Filter

- ✓ Residential in-ground and above ground pools
- ✓ Faster backwashing, less water used
- ✓ Improved pool filtration
- ✓ 10 year warranty on tank, 12 month warranty on internal fittings

E Series Media Filter

The E Series Media Filter utilises the same high quality components as AstralPool's larger sand filters to achieve sparkling clear pool and spa water.

Many residential pools place far less strain on their various components which result in the need for a correctly sized efficient sand filter.

The 'E Series Filter' provides just the right level of performance for all pools and spas up to 90,000 litres of water. With a multi-port valve the 'E Series Filter' is easy to install and provides extremely low pressure drop so smaller pumps can operate at higher flow rates.

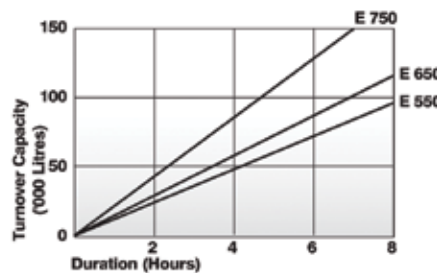

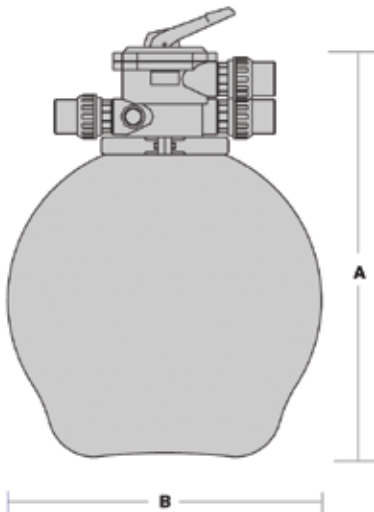

The advanced underdrain incorporates 12 laterals which efficiently cleans the filter bed and circulates the pool water in less time. This will save you water and money providing you with a superior pool filtration system.

The 'E Series Filter' is available in three different sizes and is covered by a 10 year pro rata warranty on the media filter tank. The valve and internal fittings are covered by a 12 month warranty.
